

General Information

“ Use this manual to get started with the FeedMeWatch

Welcome to the FeedMeWatch User Manual

If you're new to the FeedMeWatch app, this page will give you a quick overview of the different functionalities of the app from how to download the Beta testing version through Test Flight to the Feedback function.

The content of this User Manual is updated before the release of a new version. However, if you see anything that does not seem up-to-date, please contact the development team.

Requirements

To use the watch app, it is recommended to use WatchOS 10 and iOS 17. This will provide the best user experience. The Interface has been optimised for Series 8, Series 9 and SE. No other Apple Watch versions were tested.

Contact

Please contact us, if you experience any issues. I will recommend using the internal Feedback option from TestFlight but you are also more than welcome to [write to me](#).

Proposition for new functionalities

You are more than welcome to share your ideas to improve the app and add functionalities.
